

ANNOUNCEMENT: Radius Track Corporation Sells Jobsite Framing Tools and Hand-Bendable Framing Product Lines to Simpson Strong-Tie

We are pleased to announce that as of October 19, 2018, the Ready Products (hand-bendable framing) line of Ready-Hat®, Ready-Track®, Ready-Arch® and Ready-Angle®, along with the Radius Tools (jobsite framing tools) line of Radius Track Bender® and Radius Trim Bender™ have been acquired by Simpson Strong-Tie, a leading manufacturer of structural building products for more than 60 years.

This change does not affect Radius Track Design Services and Curved-Right® Custom Framing. Radius Track Corporation will continue as its own separate entity focused on the design, engineering and fabrication of sub-systems for curved and complex surfaces, both preconstruction and post contract award. Contact Radius Track at 1-888-872-3487 for custom solutions for curved and complex projects.

To place a new order for Ready Products or Radius Tools, please contact Simpson Strong-Tie at 1-800-999-5099. Simpson Strong-Tie is committed to ensuring a seamless transition and uninterrupted customer service as they integrate the jobsite framing tools and hand-bendable framing into their product offering.

For questions about Ready Products and Radius Tool orders placed before October 19, 2018, contact Radius Track at 1-888-872-3487.

Thank you for using Ready Products and the Track Bender & Trim Bender framing tools to quickly and accurately shape curved framing on your jobsites! We look forward to collaborating with you on future projects requiring design and precision fabrication of custom curved framing and sub-systems.

DESIGN. ENGINEER. FABRICATE.

Sub-Systems for Curved and Complex Surfaces
